[Redacted]

25X1

1. [Redacted] VEB Mineraloelwerk Luetzkendorf of Soviet crude-oil deliveries¹ revealed that no motor oil could be obtained from this crude oil due to its high content of high-boiling-point components.
2. The gasoline obtained from the Soviet crude oil has an octane rating of only 53. Gasoline obtained from the Soviet crude-oil deliveries will therefore be shipped to VEB Synthesewerk Schwarzheide where it will be mixed with gasoline produced there.
